___ Tank Model with Serial # _____

Please describe service request for above listed items

_____ I Would like rush processing. Your gear will be done in no more than 72 hours provided all parts are in stock. **Rush processing cost \$100 for regulators and \$35 for battery changes.**

Regulator System:

_____ **Bench Test:** Applicable if the system has been serviced within the last year and is not due for an overhaul as stated by the manufacturer. This includes visual inspection of all external components, bench testing of all settings, minor adjustments, if required, replacement of high pressure O-rings, silicone spray of all hoses. **Kona Honu Divers provides bench tests free of charge.**

_____ **Battery Change:** Change out the computer's battery and O-ring as well as pressure test to make sure the battery compartment is sealed to prevent flooding. **Estimated cost is \$46.**

_____ **Overhaul:** Applicable for systems that haven't been serviced in 2 years or more, for frequent divers and for systems used in dirty environments. An overhaul will include a complete disassembly, ultrasonic cleaning of metal parts, replacing or inspection and cleaning of all internal components, lubing and re-assembling for regulator first and second stages. We will also lube and replace your HP gauge O-rings and spool if necessary. If we run into any unforeseen problems like dry rotted hoses, cracked regulator bodies, etc. we will contact you. **Estimated cost is \$85-\$100 Per stage.**
